**Part III** Statement of Program Service Accomplishments (See the instructions.)

Form 990 is available for public inspection and, for some people, serves as the primary or sole source of information about a particular organization. How the public perceives an organization in such cases may be determined by the information presented on its return. Therefore, please make sure the return is complete and accurate and fully describes, in Part III, the organization's programs and accomplishments.

What is the organization's primary exempt purpose? ► <b>SEE STATEMENT 5</b>	<b>Program Service Expenses</b> (Required for 501(c)(3) and (4) orgs., and 4947(a)(1) trusts; but optional for others.)
All organizations must describe their exempt purpose achievements in a clear and concise manner. State the number of clients served, publications issued, etc. Discuss achievements that are not measurable. (Section 501(c)(3) and (4) organizations and 4947(a)(1) nonexempt charitable trusts must also enter the amount of grants and allocations to others.)	
<b>a</b> <b>SEE STATEMENT A</b>	
(Grants and allocations \$ <b>75,342.</b> ) If this amount includes foreign grants, check here ► <input type="checkbox"/>	
<b>b</b>	
(Grants and allocations \$ ) If this amount includes foreign grants, check here ► <input type="checkbox"/>	
<b>c</b>	
(Grants and allocations \$ ) If this amount includes foreign grants, check here ► <input type="checkbox"/>	
<b>d</b>	
(Grants and allocations \$ ) If this amount includes foreign grants, check here ► <input type="checkbox"/>	
<b>e</b> Other program services (attach schedule)	
(Grants and allocations \$ ) If this amount includes foreign grants, check here ► <input type="checkbox"/>	
<b>f</b> <b>Total of Program Service Expenses</b> (should equal line 44, column (B), Program services) ►	<b>8,490,980.</b>

**Part III Statements About Activities** (See page 2 of the instructions.)

		Yes	No
1	During the year, has the organization attempted to influence national, state, or local legislation, including any attempt to influence public opinion on a legislative matter or referendum? If "Yes," enter the total expenses paid or incurred in connection with the lobbying activities ► \$ _____ \$ _____ (Must equal amounts on line 38, Part VI-A, or line i of Part VI-B.) Organizations that made an election under section 501(h) by filing Form 5768 must complete Part VI-A. Other organizations checking "Yes" must complete Part VI-B AND attach a statement giving a detailed description of the lobbying activities.	1	X
2	During the year, has the organization, either directly or indirectly, engaged in any of the following acts with any substantial contributors, trustees, directors, officers, creators, key employees, or members of their families, or with any taxable organization with which any such person is affiliated as an officer, director, trustee, majority owner, or principal beneficiary? (If the answer to any question is "Yes," attach a detailed statement explaining the transactions.)		
a	Sale, exchange, or leasing of property? SEE STATEMENT 19	2a	X
b	Lending of money or other extension of credit? SEE STATEMENT 20	2b	X
c	Furnishing of goods, services, or facilities? SEE STATEMENT 21	2c	X
d	Payment of compensation (or payment or reimbursement of expenses if more than \$1,000)? SEE PART V-A, FORM 990	2d	X
e	Transfer of any part of its income or assets?	2e	X
3	a Did the organization make grants for scholarships, fellowships, student loans, etc.? (If "Yes," attach an explanation of how the organization determines that recipients qualify to receive payments.)	3a	X
	b Did the organization have a section 403(b) annuity plan for its employees?	3b	X
	c Did the organization receive or hold an easement for conservation purposes, including easements to preserve open space, the environment, historic land areas or historic structures? If "Yes," attach a detailed statement	3c	X
	d Did the organization provide credit counseling, debt management, credit repair, or debt negotiation services?	3d	X
4	a Did the organization maintain any donor advised funds? If "Yes," complete lines 4b through 4g. If "No," complete lines 4f and 4g	4a	X
	b Did the organization make any taxable distributions under section 4966? N/A	4b	
	c Did the organization make a distribution to a donor, donor advisor, or related person? N/A	4c	
	d Enter the total number of donor advised funds owned at the end of the tax year ►	N/A	
	e Enter the aggregate value of assets held in all donor advised funds owned at the end of the tax year ►	N/A	
	f Enter the total number of separate funds or accounts owned at the end of the year (excluding donor advised funds included on line 4d) where donors have the right to provide advice on the distribution or investment of amounts in such funds or accounts ►	0.	
	g Enter the aggregate value of assets in all funds or accounts included on line 4f at the end of the tax year ►	0.

TORREY PINES INSTITUTE FOR MOLECULAR

**Part IV Reason for Non-Private Foundation Status** (See pages 4 through 7 of the instructions.)

I certify that the organization is not a private foundation because it is: (Please check only **ONE** applicable box.)

- 5  A church, convention of churches, or association of churches. Section 170(b)(1)(A)(i).
- 6  A school. Section 170(b)(1)(A)(ii). (Also complete Part V.)
- 7  A hospital or a cooperative hospital service organization. Section 170(b)(1)(A)(iii).
- 8  A federal, state, or local government or governmental unit. Section 170(b)(1)(A)(v).
- 9  A medical research organization operated in conjunction with a hospital. Section 170(b)(1)(A)(iii). Enter the hospital's name, city, and state **▶**
- 10  An organization operated for the benefit of a college or university owned or operated by a governmental unit. Section 170(b)(1)(A)(iv). (Also complete the **Support Schedule** in Part IV-A.)
- 11a  An organization that normally receives a substantial part of its support from a governmental unit or from the general public. Section 170(b)(1)(A)(vi). (Also complete the **Support Schedule** in Part IV-A.)
- 11b  A community trust. Section 170(b)(1)(A)(vi). (Also complete the **Support Schedule** in Part IV-A.)
- 12  An organization that normally receives: (1) more than 33 1/3% of its support from contributions, membership fees, and gross receipts from activities related to its charitable, etc., functions - subject to certain exceptions, and (2) no more than 33 1/3% of its support from gross investment income and unrelated business taxable income (less section 511 tax) from businesses acquired by the organization after June 30, 1975. See section 509(a)(2). (Also complete the **Support Schedule** in Part IV-A.)
- 13  An organization that is not controlled by any disqualified persons (other than foundation managers) and otherwise meets the requirements of section 509(a)(3). Check the box that describes the type of supporting organization:  
 Type I       Type II       Type III-Functionally Integrated       Type III-Other

Provide the following information about the supported organizations. (See page 7 of the instructions.)

(a) Name(s) of supported organization(s)	(b) Employer identification number (EIN)	(c) Type of organization (described in lines 5 through 12 above or IRC section)	(d) Is the supported organization listed in the supporting organization's governing documents?		(e) Amount of support
			Yes	No	
<b>Total</b>					<b>▶</b>

- 14  An organization organized and operated to test for public safety. Section 509(a)(4). (See page 7 of the instructions.)

**Part IV-A Support Schedule** (Complete only if you checked a box on line 10, 11, or 12.) Use cash method of accounting.  
 Note: You may use the worksheet in the instructions for converting from the accrual to the cash method of accounting.

Calendar year (or fiscal year beginning in)	(a) 2005	(b) 2004	(c) 2003	(d) 2002	(e) Total
15 Gifts, grants, and contributions received. (Do not include unusual grants. See line 28.)	6,800,870.	6,280,577.	6,639,378.	7,219,179.	26,940,004.
16 Membership fees received					
17 Gross receipts from admissions, merchandise sold or services performed, or furnishing of facilities in any activity that is related to the organization's charitable, etc., purpose	1,312,529.	478,796.	379,912.	1,098,097.	3,269,334.
18 Gross income from interest, dividends, amounts received from payments on securities loans (section 512(a)(5)), rents, royalties, and unrelated business taxable income (less section 511 taxes) from businesses acquired by the organization after June 30, 1975	54,297.	71,114.	183,784.	52,288.	361,483.
19 Net income from unrelated business activities not included in line 18	97,930.	243,202.	227,971.	41,229.	610,332.
20 Tax revenues levied for the organization's benefit and either paid to it or expended on its behalf					
21 The value of services or facilities furnished to the organization by a governmental unit without charge. Do not include the value of services or facilities generally furnished to the public without charge					
22 Other income. Attach a schedule. Do not include gain or (loss) from sale of capital assets	69,593.		SEE STATEMENT 22		69,593.
23 Total of lines 15 through 22	8,335,219.	7,073,689.	7,431,045.	8,410,793.	31,250,746.
24 Line 23 minus line 17	7,022,690.	6,594,893.	7,051,133.	7,312,696.	27,981,412.
25 Enter 1% of line 23	83,352.	70,737.	74,310.	84,108.	
26 Organizations described on lines 10 or 11: a Enter 2% of amount in column (e), line 24					26a 559,628.
b Prepare a list for your records to show the name of and amount contributed by each person (other than a governmental unit or publicly supported organization) whose total gifts for 2002 through 2005 exceeded the amount shown in line 26a. Do not file this list with your return. Enter the total of all these excess amounts					26b 196,862.
c Total support for section 509(a)(1) test: Enter line 24, column (e)					26c 27,981,412.
d Add: Amounts from column (e) for lines: 18 <u>361,483.</u> 19 <u>610,332.</u> 22 <u>69,593.</u> 26b <u>196,862.</u>					26d 1,238,270.
e Public support (line 26c minus line 26d total)					26e 26,743,142.
f Public support percentage (line 26e (numerator) divided by line 26c (denominator))					26f 95.5747%
27 Organizations described on line 12: a For amounts included in lines 15, 16, and 17 that were received from a "disqualified person," prepare a list for your records to show the name of, and total amounts received in each year from, each "disqualified person." Do not file this list with your return. Enter the sum of such amounts for each year: N/A					
(2005) (2004) (2003) (2002)					
b For any amount included in line 17 that was received from each person (other than "disqualified persons"), prepare a list for your records to show the name of, and amount received for each year, that was more than the larger of (1) the amount on line 25 for the year or (2) \$5,000. (Include in the list organizations described in lines 5 through 11b, as well as individuals.) Do not file this list with your return. After computing the difference between the amount received and the larger amount described in (1) or (2), enter the sum of these differences (the excess amounts) for each year: N/A					
(2005) (2004) (2003) (2002)					
c Add: Amounts from column (e) for lines: 15 _____ 16 _____ 17 _____ 20 _____ 21 _____					27c N/A
d Add: Line 27a total _____ and line 27b total _____					27d N/A
e Public support (line 27c total minus line 27d total)					27e N/A
f Total support for section 509(a)(2) test: Enter amount on line 23, column (e) ▶ 27f N/A					
g Public support percentage (line 27e (numerator) divided by line 27f (denominator))					27g N/A %
h Investment income percentage (line 18, column (e) (numerator) divided by line 27f (denominator))					27h N/A %
28 Unusual Grants: For an organization described in line 10, 11, or 12 that received any unusual grants during 2002 through 2005, prepare a list for your records to show, for each year, the name of the contributor, the date and amount of the grant, and a brief description of the nature of the grant. Do not file this list with your return. Do not include these grants in line 15.					

TORREY PINES INSTITUTE FOR MOLECULAR

**Part V Private School Questionnaire** (See page 9 of the instructions.)

N/A

(To be completed ONLY by schools that checked the box on line 6 in Part IV)

		Yes	No
29	Does the organization have a racially nondiscriminatory policy toward students by statement in its charter, bylaws, other governing instrument, or in a resolution of its governing body?		
30	Does the organization include a statement of its racially nondiscriminatory policy toward students in all its brochures, catalogues, and other written communications with the public dealing with student admissions, programs, and scholarships?		
31	Has the organization publicized its racially nondiscriminatory policy through newspaper or broadcast media during the period of solicitation for students, or during the registration period if it has no solicitation program, in a way that makes the policy known to all parts of the general community it serves? If "Yes," please describe; if "No," please explain. (If you need more space, attach a separate statement.)		
<hr/> <hr/> <hr/>			
32	Does the organization maintain the following:		
a	Records indicating the racial composition of the student body, faculty, and administrative staff?	32a	
b	Records documenting that scholarships and other financial assistance are awarded on a racially nondiscriminatory basis?	32b	
c	Copies of all catalogues, brochures, announcements, and other written communications to the public dealing with student admissions, programs, and scholarships?	32c	
d	Copies of all material used by the organization or on its behalf to solicit contributions? If you answered "No" to any of the above, please explain. (If you need more space, attach a separate statement.)	32d	
<hr/> <hr/>			
33	Does the organization discriminate by race in any way with respect to:		
a	Students' rights or privileges?	33a	
b	Admissions policies?	33b	
c	Employment of faculty or administrative staff?	33c	
d	Scholarships or other financial assistance?	33d	
e	Educational policies?	33e	
f	Use of facilities?	33f	
g	Athletic programs?	33g	
h	Other extracurricular activities? If you answered "Yes" to any of the above, please explain. (If you need more space, attach a separate statement.)	33h	
<hr/> <hr/>			
34 a	Does the organization receive any financial aid or assistance from a governmental agency?	34a	
b	Has the organization's right to such aid ever been revoked or suspended? If you answered "Yes" to either 34a or b, please explain using an attached statement.	34b	
35	Does the organization certify that it has complied with the applicable requirements of sections 4.01 through 4.05 of Rev. Proc. 75-50, 1975-2 C.B. 587, covering racial nondiscrimination? If "No," attach an explanation	35

STATEMENT A  
2006 Form 990, Part III

Statement of Program Service Accomplishments

a. **MULTIPLE SCLEROSIS:** The Multiple Sclerosis National Research Institute (the "MS Institute") is a division of TPIMS devoted to studying the causes, diagnosis, and possible treatments for MS, with the ultimate goal of finding a cure. Our world-renowned scientists conduct the research needed to understand and treat this disease, so that all MS patients may return to living healthy and disease-free lives. Ongoing research includes studies to understand the causes of MS, the development of treatments for MS, and the design of novel strategies for the development of vaccines against MS.

Understanding MS

Why does the immune system attack and destroy the myelin sheath? Under a grant previously funded by a different source, Dr. Eli Sercarz, a world-renowned MS researcher, discovered that EAE, an MS disease model used in the laboratory, can be induced by a specific group of immune cells, or T cells, that "drive" the disease. Here at the MS Institute, the laboratory of Dr. Sercarz is now investigating these "driver" immune cells in more detail, hoping to determine why and how these specific "driver" cells induce inflammation, causing such detrimental effects on the brain and spinal cord.

The MS Institute also supports the work of another world-renowned researcher, Dr. Vipin Kumar. Dr. Kumar's team is exploring the mechanisms that the immune system uses to turn off the immune attack. There exists a natural immune response that can cause spontaneous recovery from EAE (the laboratory model for MS). By understanding this process of spontaneous recovery, Dr. Kumar hopes to arrive at information required to design strategies to reeducate the immune system to recognize the myelin sheath tissue as "self", rather than as foreign tissue.

Treating MS

The most common form of MS, called relapsing-remitting MS ("RR-MS"), affects approximately 85% of patients. There are currently five FDA-approved treatments for RR-MS, one of which is Copaxone®. Copaxone® is at least as efficacious as the other treatments, but sometimes with significant side effects. At the MS Institute, Drs. Richard Houghten and Clemencia Pinilla began this project by accessing the MS Institute's "combinatorial libraries" – millions to trillions of compounds organized in a mixture format. Next, they used the MS Institute's patented methods for screening these libraries. Using the resulting data, they designed a "custom library". Within this custom library they discovered new potential drug candidates which are as effective as Copaxone® in laboratory studies using the EAE model for MS. In collaboration with Dr. Roland Martin and his team at the Research Institute Vall d'Hebron University Hospital in Barcelona, Spain, Pinilla and Houghten are guiding these new drug candidates as they move towards further testing in early stage clinical trials. During the year, \$8,000 US was provided to Vall d'Hebron University Hospital in order to conduct this research and to train a postdoctoral research fellow.

Curing MS

Vaccines may hold the promise of a cure for MS. Scientists at the MS Institute are testing a variety of strategies for designing a vaccine against MS.

Dr. Eli Sercarz' work, described earlier, is focused on understanding MS by studying the "driver" T cells which he discovered to be responsible for inducing inflammation in EAE. Using a strategy that is similar to that used to develop vaccines against viruses, Dr. Sercarz's group is testing the possibility that immunization of models that are susceptible to EAE with the "driver" clones might stimulate immune cells that will prevent the action of the "driver" cells. This approach could result in a new vaccine strategy for MS.

Dr. Vipin Kumar has a similar dual goal. He hopes to advance the understanding of MS by discovering how a natural immune response to EAE allows spontaneous recovery from EAE. By investigating the specifics of

this mechanism, and uncovering a way to stimulate the production of the body's own regulatory cells, he hopes to find answers which are instrumental in designing more effective vaccines against MS.

Another approach to find vaccines begins with the use of the MS Institute's "combinatorial libraries" – similar to those used to identify the "Copaxone®-mimic" described earlier. Using the MS Institute's patented libraries and screening methods, Dr. Darcy Wilson is systematically searching the libraries for peptide compounds which show a wide range of biological activity against a T cell clone known to cause EAE. The important finding thus far is that some of these library-defined peptides activate the T cell clone to cause disease, while others are very effective at blocking this disease-causing activity. By identifying active compounds that prevent the development of disease, or that modify ongoing disease, Wilson hopes to use these compounds for the development of vaccines to down-regulate the underlying autoimmune process in MS.

During FY07, our research and related program services were supported by very generous donations from hundreds of thousands of individuals via workplace campaigns, such as the Combined Federal Campaign, United Way and Neighbor to Nation. Our work is also supported by ongoing grants from the National Institutes of Health, and one small private foundation grant.

*Program Expense: Multiple Sclerosis*

*\$ 1,113,267*

b. **CANCER and AGING:** Instead of the standard treatments for cancer (surgery, chemotherapy and radiation), scientists at our Institute believe that with the identification of new compounds, they can use the power of the body's immune system to combat cancer. One scientist works on inducing immunity in T cell lymphomas; another induces the immune system to destroy certain carcinomas which contain a specific type of carbohydrate. Another scientist, working specifically with prostate cancer, is studying how to convert a certain "microenvironment" into a "killing environment" against prostate tumor cells. Our scientists work with various forms of cancer cells, including breast cancer, prostate cancer and melanoma. A new project for this past year is for lung cancer. Other areas of aging-related research include cachexia, Alzheimer's disease, and influenza in the aging population. Our researchers are quite well-known, and we have established cooperative research partnerships with scientists at other institutions from around the world. We are funded by grants received from the National Institutes of Health, Department of Defense, and Alzheimer's and Aging Research Center, as well as by contracts with biotechnology companies and generous donations from the public.

*Program Expense: Cancer and Aging*

*\$1,092,051*

c. **DIABETES:** According to the National Institutes of Health, diabetes affects more than 16,000,000 Americans every year. We conduct research to understand the causes, diagnosis, treatment and prevention of types 1 and 2 diabetes. We conduct research focused on the many health complications that arise from diabetes. "Free fatty acids" are molecules in our bodies that interact with proteins, membranes and cells of the immune system. We study the many ways that these molecules behave, including methods of measuring them in human blood. Besides diabetes, a number of diseases such as cancer, sepsis and ischemia, can result in changes in the levels of free fatty acid molecules in the blood. It is possible that early detection of free fatty acid molecule levels in the blood can result in earlier detection of diabetes and other diseases. Our scientists also study various types of T cells to determine how certain types fight against type 1 diabetes, how type 1 diabetes can cause cachexia, how to prevent rejection of transplanted islet cells, and how to help with the neuropathic pain suffered by many type 1 patients. Our research is supported by grants from the National Institutes of Health, Diabetes National Research Group, Juvenile Diabetes Research Foundation, and by donations made by individuals and corporations.

*Program Expense: Diabetes*

*\$ 703,540*

d. **CHEMISTRY:** When Torrey Pines Institute for Molecular Studies first opened its laboratories sixteen years ago, its main research focus was in the area of chemistry. The research resulted in a new method of drug discovery called, "combinatorial chemistry", which is now being used by researchers worldwide to help find new drugs and diagnostics for diseases. This group also supports all of the other research being conducted at our Institute by providing the "chemical libraries" needed for those groups in their search for vaccines, therapeutics, and diagnostic compounds. As a result of the methods invented and developed in our chemistry laboratories, we have been able to make significant progress in all of our research groups. We now partner with other research centers to make compounds to be used by researchers all over the world in areas such as cancer research. Research results have been presented to the public in hundreds of scientific journal articles and in scientific presentations worldwide. We have trained many scientists in these methods not only in San Diego, but also across the United States and around the world. This group is supported by the National Institutes of Health, National Science Foundation, the State of California, various corporate research contracts, and generous donations from the public.

*Program Expense: Chemistry*

*\$1,192,492*

e. **INFECTIOUS DISEASE:** Antibiotic resistance has become overwhelmingly commonplace as more bacterial and viral strains adapt to current treatments and are becoming more difficult to cure. Our research is focused on finding new compounds to fight bacteria, viruses, parasites and fungi. Several compounds we have developed thus far are being investigated by a pharmaceutical company for further development. Our hope is that eventually these compounds will play a major role in treatments for bacterial and fungal infections.

Despite the efforts of thousands of researchers around the world, there is still no known cure for AIDS. The most popular treatment for AIDS patients today is providing medication that helps prevent the virus that causes AIDS, HIV-1, from replicating itself inside the body. We are screening different compounds to develop drugs to combat HIV-1 and possibly develop a vaccine. One scientist is studying "virus-like particles" as a platform for an HIV vaccine. These particles are synthetic; they look and act like HIV, but are non-infectious. Another scientist focuses on the many opportunistic infections that invade immunocompromised individuals, hoping to arrive at methods for treating those patients when they become attacked by viruses that their immune system can not fight.

Additional programs include studying Leishmania, a parasite that causes "black fever" in 3<sup>rd</sup>-world countries. A new program started during this fiscal year is a very large cooperative project, being carried out in conjunction with several other research institutes. It involves the underlying mechanisms of small-pox virus infections, and how these mechanisms can translate to vaccines for other viruses.

Funding for these research programs was provided by grants from the National Institutes of Health, the Bill and Melinda Gates Foundation (subcontracted through Duke University), and AIDS & Infectious Disease Science Center. We are also funded by various corporate contracts and donations from the public.

*Program Expense: Infectious Diseases*

*\$2,525,362*

f. **TRANSPLANTATION, TRAUMA-INDUCED SHOCK, AND GENETICS:** These researchers study areas of application ranging from radiation trauma and trauma-induced shock, to bone marrow transplant therapy, to the genetic analysis of the immune system. One group is studying how DNA repairs itself following trauma such as radiation exposure. By understanding genes that control the numbers of specialized cells in bone marrow, our scientists believe that they can improve the methods of today's bone marrow transplant therapy. Another group studies details of the immune system in order to prevent transplantation rejection. We are also collaborating with scientists from other institutions in the study to determine the genes in antibodies. Our research is supported by the National Institutes of Health and Diabetes National Research Group.

*Program Expense: Transplantation, Shock & Genetics:*

*\$ 267,953*

g. **HEART DISEASE:** Our research on treatments for heart disease includes detailed studies of compounds called enzymes and free-fatty acids. The administration of one of these enzymes (t-PA) is currently the standard treatment of acute myocardial infarction, a major killer of both American men and women. We are looking for new compounds which affect these enzymes, with the hope of eventually discovering new therapeutic treatments for heart disease. We are also studying these enzymes as a therapeutic tool for the prevention of restenosis (the renarrowing of a previously treated artery), a condition that occurs after a vascular procedure such as angioplasty. We are involved in the study of "complement proteins", which defend the body against infection. The goal of our research is to obtain molecular pictures of the series of interactions that occur among complement proteins during recognition and killing of foreign cells. Uncontrolled complement activation contributes to many chronic inflammatory conditions, such as heart attack, heart disease and rejection of non-human transplanted tissue. We are working on a diagnostic procedure for use in emergency rooms, for the immediate determination of stroke vs. myocardial infarction. We also are working on studies of plasminogen activators, and how they affect clotting, which can lead to blood clots. The studies were funded by grants from the National Institutes of Health and from Alzheimer's and Aging Research Center.

*Program Expense: Heart Disease*

*\$1,382,679*

h. **CHRONIC PAIN:** The goals of this research are to better understand the causes of chronic pain, especially as it relates to the conditions of arthritis and of cancer, as well as to find alternatives to current medications used for the management of pain, such as morphine. A common treatment in the use of pain, morphine has many deleterious side effects associated with its use. We have found several compounds that are being investigated by a pharmaceutical partner, with the hope of making chemical compounds into drugs that are effective pain relievers. Our research is supported by the National Institutes on Drug Abuse, Arthritis and Cancer Pain Research Institute, Alzheimer's and Aging Research Center, corporate contracts, and donations.

*Program Expense: Chronic Pain*

*\$ 6,864*

i. **WOMEN'S HEALTH: OSTEOPOROSIS, BREAST CANCER, LUPUS:** A study that is currently being done at our Institute will determine if breast cancer, by altering normal levels of free fatty acids (FFA), prevents the body's immune system from destroying the tumor. If our hypothesis is supported by the results of this study, a new approach to treating breast cancer would be available. By testing the levels of FFA needed to block the body's immune system and measuring FFA levels from human breast cancer tissue, we will determine if this fluid is actually preventing the body of killing cancer cells. In other studies, we are combining the technologies of T-cell immunobiology and synthetic peptide chemistry to identify antigens that can be used for therapeutic vaccines for metastatic breast and ovarian cancers. This research is funded by grants from the Department of Defense, National Cancer Institute, Osteoporosis and Breast Cancer Research Center, and donations from individuals.

*Program Expense: Osteoporosis & Breast Cancer*

*\$ 41,444*

j. **OTHER PROGRAM ACTIVITIES:** The mission at "TPIMS" is not only to conduct scientific research, but also to ensure that our research discoveries make a difference to humans. We accomplish this by supporting our scientists in their endeavors to publish, to travel worldwide in order to give lectures and other presentations, to establish and maintain collaborations with other scientists, and to act as mentors to students and young scientists just beginning in their careers. Over the past year, TPIMS scientists traveled throughout the United States and worldwide to share research results, to learn of others' research, and maintain important collaborative efforts. Countries benefiting included Argentina, Canada, China, England, France, Germany, Hungary, Israel, Italy, Japan, Spain, Sweden, Switzerland, The Netherlands, and Tunisia.

Within the United States, the various states included Alabama, Arizona, California, Connecticut, Delaware, Florida, Illinois, Massachusetts, Maryland, Michigan, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, Texas, Utah, Virginia, Washington, Washington D.C., and Wisconsin.

TPIMS started operations in temporary quarters at its new division in Port St. Lucie, Florida. A permanent, state of the art research center is under construction and is expected to be completed in early 2009. The funding for this new division was granted to TPIMS from the State of Florida, the city of Port St. Lucie, and Port St. Lucie County.

TPIMS continued to work on its newly-designed website containing information of interest not only to researchers and medical professionals, but also to individuals interesting in learning about the variety of disease areas being studied at TPIMS. We purchased shared laboratory equipment, repaired and maintained older shared equipment, and made renovations in laboratories when needed. At TPIMS, we strive to provide a collegial and supportive environment for our scientists. We recognize the necessity of maintaining facilities with well-functioning equipment, and, when possible, state-of-the-art new equipment. This type of environment allows the research investigators to apply their time and creative energy on asking new questions, testing ideas, and ultimately, on improving the lives of humans throughout the world.

**2006 FORM 990**

**STATEMENT B**

**Part VIII**

**Relationship of activities to the accomplishment of exempt purposes**

EXPLANATION OF RELATIONSHIP OF ACTIVITIES

LINE 93A Our exempt purpose is to conduct biomedical research directed towards the improvement of human health, and to make the results available to other scientists and the general public. During the past year, scientists at Torrey Pines Institute for Molecular Studies authored over fifty (50) publications which appeared in scientific journals distributed worldwide, made over thirty (30) oral presentations of their research results at scientific meetings all over the world, and delivered over twenty (20) poster presentations at these same meetings. The scientific conferences at which we present our research typically attract anywhere from hundreds to thousands of scientists, medical professionals, medical students, postdoctoral research fellows in training, graduate and undergraduate science students. Still thousands more have access to the publications which originate from our institute, and thousands more access our websites for information relating to the various diseases we study. We also have hundreds of ongoing collaboration with scientists throughout the world.

LINE 93B Research carried on under a contract with National Institute of Allergy and Infectious Diseases ("NIAID") allowed TPIMS scientists to research new methods for making vaccines for a variety of infectious diseases. Students and postdoctoral research fellows also had the opportunity for training and learning about infectious diseases and vaccination, and publications resulted from the work. Thousands of scientists, postdoctoral research fellows and students have access to the publications originating from our institute, and thousands more access our websites for information relating to our own research as well as general information relating to the various diseases we study. Our scientists also have hundreds of research collaborations throughout the world.

**2006 FORM 990**

**STATEMENT C**

**Form 990, Schedule A, Part III, Line 2**

**Activities with directors, trustees, principal officers, or creators**

The following transactions were with an organization in which an officer of Torrey Pines Institute for Molecular Studies was also an owner of Mixture Sciences, Inc. and FFA Sciences, LLC.

Torrey Pines Institute was reimbursed for other miscellaneous items purchased at fair market value for Mixture Sciences, Inc. The total amount of reimbursements received was \$107,867, which includes the following: \$40,726 for rent and \$67,141 for other services and miscellaneous reimbursements.

Torrey Pines Institute was reimbursed for other miscellaneous items purchased at fair market value for FFA Sciences, LLC. The total amount of reimbursements received was \$298,545, which includes the following: \$162,000 for rent, \$109,995 for research contract expenses, and \$26,550 for other services and miscellaneous reimbursements.

On July 7, 2004, the Institute entered into a secured promissory note ("Note") for \$150,000 with Peggy Totsky, the COO and CFO of the Institute. The Note bears interest at 5.34 percent and is secured by a second priority deed of trust. Interest payments are due annually with the principal due in July 2014 or six months after termination of employment, whichever is earlier. At June 30, 2007, the principal balance is \$120,000.
