				Long-Term Realized Disallowed Loss	0 00
				Total Long-Term Realized Gain/Loss	184.41 ††

†† - All gain/loss information may not be reflected due to incomplete cost basis information

f - FIFO (First-in, First-out)

cp - Cost basis information (or proceeds from short sales) was provided by you We treat it as original cost basis For equities, we will adjust the cost basis for any corporate actions which our system supports from the date the security was transferred to the account For asset-backed fixed income securities, we will adjust the cost basis for principal pay downs from the date the security was transferred to the account We do not apply any wash sale rules to tax lots with customer-provided cost basis In certain cases, when positions are transferred between accounts the cost basis information may be automatically transferred and deemed to be customer-provided

d - Adjusted cost basis reflects any cumulative original issue discount, premium, or acquisition premium (including any year-to-date amount) It assumes such amounts were amortized or accrued for tax purposes from the acquisition date through the disposition date Premium amortization was calculated using the yield-to-maturity method Acquisition premium was calculated using the ratable accrual method Any market discount accretion for this position was calculated using the straight-line method and, if applicable, recognized upon disposition Gain/loss displayed for this transaction is calculated using the cost basis adjustments, as described above The adjusted cost basis used here may not reflect all adjustments necessary for tax reporting purposes (such as wash sale adjustments) and may not apply if you are using an alternative amortization calculation method Refer to IRS Publication 550, *Investment Income and Expenses*, for additional information

j - Current year amortized premium was calculated using the yield-to-maturity amortization method Cumulative premium amortization from acquisition date through disposition date is reflected in the adjusted cost basis For tax-exempt securities, amortization of premium is required and is not deductible from taxable income For taxable bonds, a tax election may be required to amortize premium, and the current year's amortized premium may be deductible from taxable income Our adjusted cost basis calculation may not reflect all adjustments necessary for tax reporting purposes It may not be applicable if you have not made a particular tax election or if you are using an alternative amortization calculation method Review prior adjustments that you have made, and consult your tax advisor and IRS Publication 550, *Investment Income and Expenses*, for additional information

r - Market discount income was calculated using the straight-line method from acquisition date through disposition date Our calculation assumed the taxpayer elected to defer recognizing the market discount until sale (disposition) Other elections available under tax laws may be more beneficial, depending on your individual tax situation For federal tax purposes, market discount income, from both taxable and tax-exempt bonds is treated as taxable interest income

p - For fixed income securities subject to paydowns (early repayment of principal), cost basis is adjusted using a method that takes paydowns into account and, in some cases, calculates original issue discount, premium, and acquisition premium using a straight-line method Note that this method may not produce your adjusted tax basis for federal tax purposes Refer to IRS Publication 550, *Investment Income and Expenses*, for more information and consult your tax advisor If gain/loss has not been calculated for this position, it has had return of principal payments greater than its original cost basis.

Amortization, accretion, and similar adjustments to cost basis are not provided for short-term instruments, unit investment trusts, or securities of foreign issuers
